## MACO MARCHANTER OF THE PROPERTY OF THE PROPERT

# Have you ever asked Why

You cannot immediately have a warm shower?

000

ou waste the first cold water from the shower?

For a better tomorrow,

### ONE the FULL SYSTEM

- Increase your quality of life with warm shower
- Save water, save earth, environment friendly

- Upon use of the faucet, an additional 4 liter of water is saved in the toilet bowl tank.
- The toilet bowl is using the most water inside the bathroom. Thus, we have developed a bigger water tank to get about 4 liter of water from faucet.
- Upon using the toilet bowl, we have designed in a manner so it will only flush 6 liter and keep the remaining.

#### Instruction

Upon turning the handle to D and pulling, the system will activate and temperature display will show the actual water temperature. At this time, water won't come out.

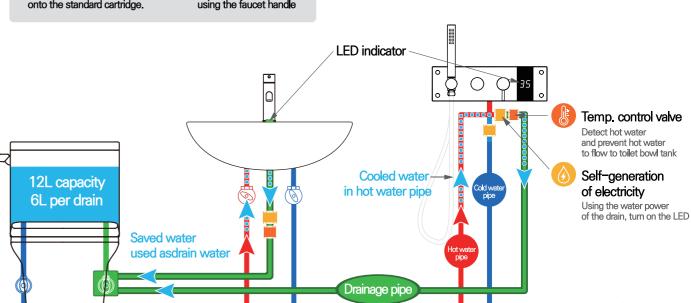

The cold water will be directed to the toilet bowl water tank and once the water temperature becomes warm (30°C~35°C), temperature display turns off. Then the warm shower is ready to be used.

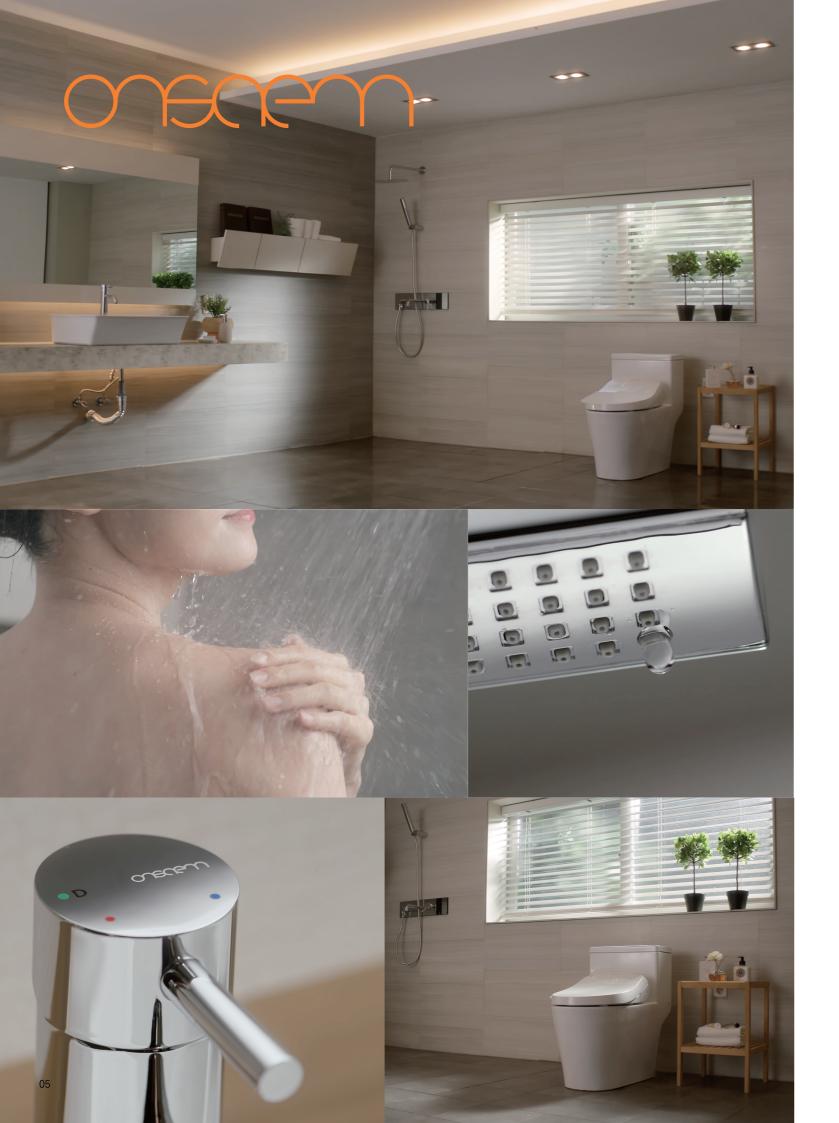

Using the handle, turn to your most comfortable temperature and enjoy your shower!
