

## Sorting Principle of TIPPY

## TIPPY Sorting Sample

## Grade Sorting Sample

### Real color recognition makes it work faster and more reliable.

TIPs and bad material have the same color, TIPs & good material can be sorted by RGBN camera to analyse the color wave of the tea.

## Sorting Principle

## Sorting Process

A combination of the most advanced RGBN and IR LED identifies the widest range of defective teas and impurities. It reduces compressed air consumption per channel up to 30%. The ejectors accurately target and remove defects.

An up-to-date sorter uses RGBN technology combined with fast, precise ejectors to reject as many defective product as possible while minimizing the number of good product blown out of the stream at the same time.

## WE'RE ALWAYS LOOKING TO THE FUTURE & GLOBE

Our commitment to 45-year-old research and development underpins our continuing reputation for innovation and creativity. Innovation and creative are the guiding principles that have been with us from the beginning. Abiding respect for diverse agricultural traditions.

And also a competitive spirit is our principle too. In global agricultural market we will build our future, though the market is so tough.

### DAEWONGSI's most efficient Sorter Series

NANTA XPEDIA+ series

SPK+ series

CCS series

NANTA KB+ series

※ DAEWON GSI reserves the right changing equipment circuitry design, specifications, features, external design, dimensions and functions without any prior notice, for promoting the quality of the products. Equipment featured in this publication may vary from that actually delivered. Your authorized DAEWON GSI representative will be glad to provide you with the final sales details and a copy of the terms and conditions of sale.

## Full Color + IR Tea Sorter

# NANTA XPEDIA+ SERIES

New extraordinaire color sorter NANTA XPEDIA is specialized in TEA 18 Cameras

- 5376 pixel HD True Color (16 million color/24-bit) Japanese CCD sensor with Nikon lens
- 1st pass picking and improved Tippy sorting
- Auto Image Calibration and LED Lightness Control
- Wireless Remote control with Tablet or Smart Phone
- Full power protection

# NANTA XPEDIA+ SERIES

18 Cameras

## RGBN

NANTA XPEDIA+ SERIES presents you an excellent TIPPY sorting by full color camera with the latest technology.

You will be satisfied by our new color sorter on a powerful defect detection according to your various circumstances and standards.

- RGBN Camera (true color recognition + visible NIR)
- LED : Excellent performance for TIPPY sorting
- Sorting a variety of the material(black tea and green tea)
- Display the error message automatically
- Flat type chute : increased capacity (40-45%)
- High efficient vibrator supplies the material steadily
- Remote control by wireless internet with tablet/mobile device
- Fast reaction with the best algorithm

## NEW TECH RGBN CAMERA

- Sorting all the defects of tea.
- Sorting foreign material difficult to separate such as INSECT, SMALL SPOT, STONE, VINYLE, GLASS, etc.

## ANDROID SYSTEM

- Touch Panel, Rapid & smooth control.
- UI update by internet.
- Simple UI design.

## HIGH LUMINANT LED

- High luminant LED module with 30% of enhanced intensity
- Adopting ALC(auto lighting control) and widening color expression
- Keeping normal brightness and extending the life, removing noise
- IR LED semi-permanent life time

## CHUTES and FEEDING

- Feeding
- Less vibration
- Less power consumption
- Automatic feeder control
- Increased capacity by flat type chute

## TEA GRADING

- Tea leaf grade sorting by width
- Classify OP, BOP, PEOKOE etc
- Grade at each stage

## HI EFFECIENCY EJECTOR

- Tailored ejector by time tested own technology
- Fully upgraded with feedback from the sight
- High accuracy and efficiency(1000times per second)
- Verified technology and life-time
- Monitoring of ejector temperature and voltage

## Remote Control

- Remote control by TELEGRAM Messenger.
- Alert Alarm & Monitoring Service.

## Installation

All electronics and software have been newly designed. The change to both the mechanical design and the digital processing technology have improved the sorting efficiency.

### Site

Intended for the machine should be leveled and firmed. Where a built-up platform or structure is provided it should absorb any vibrations from surroundings plant or machinery.

### Environment

In common with other electronic equipment, the machine is not used in an environment where the ambient temperature is above 45°C (113°F) or at below freezing point. Humidity and dust should be kept to the minimum.

### Lighting

The ambient lighting should not be varied during the day and should have no bright spots or glare from the sun or overhead lamp.

### Clearance

It's particularly important to allow sufficient clearance at the front and rear of the unit for removing lamp assembly and permitting reasonable access for servicing the various items.

## Sorting Sample

	Black Tea	Black Tea	Black Tea	Green Tea	Japanese Green Tea	Seaweed
material						
1st BOX						
2nd BOX
